

Entrepreneurship Development Program - Module I (EDP) ICE - BREAKING SESSION

Unemployment is one of the most important problems confronting developing and underdevelopment countries, EDP's enable prospective entrepreneurs in the setting up of their own units, thus enabling them to get self employment & also to be employment generator.

EDP is a device through which people with latent entrepreneurial traits are identified, motivated to follow their dreams.

Recently, CED conducted EDP Module - I Ice - Breaking Session to encourage social interaction and team building among the participants. This session is intended to help members of a group begin the process of forming themselves into a team.
