HAND HOLDING & MENTORING SUPPORT

TO CED TRAINEES &
ENTREPRENEURS

The monitoring and evaluation aspects are the integral part of any promising organization for its growth as well as proper tracking of progress status. In this context, CED, after completing the Online Entrepreneurship Development Programs regularly follow the progress of the trainees/entrepreneurs.

CED always aims to support them, motivate them and guide these trainees for their endeavors to launch any enterprise. CED mentors these trainees through its hand holding support and a well developed system that enables proper monitoring.

Here are some highlights about how CED monitors their progress:

- Separate WhatsApp groups for hand holding and mentoring support to the entrepreneurs/trainees
- Senior Officers from CED are being added in the group to guide trainees
- Informative videos and study materials are regularly shared to the interested trainee in group OR in person
- Any questions or queries are invited and discussed in the group
- CED plans to arrange a video conferencing meeting for the individuals who are keen to discuss further
