

# SKILL DEVELOPMENT TRAINING

In today's age of globalisation and technological volatility, skill building is an important instrument to increase the efficacy and quality of labour for improved productivity and economic growth. Skill Development is the driving forces behind the financial growth and community development of any country.

In the present COVID-19 period, CED allowed their training partners to go online for the theory sessions. However, with one step towards the new normal, CED's training partners has now started with practical training as well with all precautions and care.
