## WOMEN EMPOWERMENT A HOLISTIC APPROACH

Women's economic empowerment refers to the ability for women to enjoy their right to control and benefit from the resources, assets, income and their own time, as well as the ability to manage risk and improve their economic status and well being.

**At CED, we firmly believe in empowering women to enable them to participate fully in economic life across all sectors which is essential to build stronger economies.**

Considering the same, programs focused on women empowerment are organized regularly. CED recently organized such a Human Resource Development program for Women on the topic "Women Empowerment - A Holistic Approach" on 26th Oct, 2020. This program includes personality development, achievement motivation, decision making, transaction analysis for improving interpersonal relationships and effective time management.
