COLLABORATING OPPORTUNITIES WITH CED

Collaboration leads to more innovation, efficient processes, increased success, and improved communication. Through listening to and learning from the partners, you can help each other reach mutual goals. Hence, CED is always open for collaborative opportunities to meet its goal of reaching aspiring individuals.

CED is collaborating with interested private players & training partners who want to undertake EDP training programs. These partners will organise various training programs at different districts and benefit the trainees. CED will also aid them in arranging sessions and other administrative issues.

We are in talks with five partners for the same and have provided CED MIS related training to them. The programs under this will begin in December 2021.

Reputed and professionally managed NGO are also welcome to partner with CED to explore opportunities for organizing EDP training.
